However, if involved in a fire, this product may decompose at high 5.1 Fire & Explosion Hazards temperatures to form toxic gases (e.g., CO,CO<sub>x</sub>). 5.2 Extinguishing Methods: Water, Foam, CO<sub>2</sub>, Dry Chemical, Halon (if permitted). Use water spray to cool unopened containers 5.3 Firefighting Procedures: Fight fires as for surrounding materials. As in any fire, wear MSHA/NIOSH approved self-contained breathing apparatus (pressure-demand) and full protective gear. Keep containers cool until well after the fire is out. Use water spray to cool fire-exposed surfaces and to protect personal. Fight fire upwind. Avoid spraying water directly into storage containers because of danger of boil-over. Prevent runoff from fire control or dilution from entering sewers, drains, drinking water supply, or any natural waterway. Firefighters must use full bunker gear including NIOSH-approved positive pressure self-contained breathing apparatus to protect against potential hazardous combustion or decomposition products and oxygen deficiencies. 6. ACCIDENTAL RELEASE MEASURES Before cleaning any spill or leak, individuals involved in spill cleanup must wear appropriate Personal Protective 6.1 Spills Equipment. Plastic or rubber gloves, respirator, eye protection and apron may be required for clean-up of large spills.
