

Higher frequency signals,  
meet Trueform signal integrity.

Higher frequency Agilent 33600A Series waveform generators with Trueform technology deliver unparalleled signal integrity. Choose from four models to accelerate even your most complex tests.

#### 33600A Series Waveform Generators

- 1 GSa/s sampling rate and up to 120 MHz bandwidth
- Arbs with sequencing and 64 MSa memory
- 1 ps jitter, 1/100<sup>th</sup> the jitter of DDS generators
- 5x lower harmonic distortion than DDS generators
- Compatible with Agilent BenchVue software

Experience the 33600A. Scan the QR code or use the Layar app to see a video
