Get a scalable to 480kW load of this

Introducing the Most Accurate, Highest Density, Fully Equipped Programmable High Power DC Loads Available

The NEW 63200A series of high power loads bring wider operating voltage and current ranges up to 480kW, sine wave loading, dynamic frequency sweep to 50kHz, digitizing, MPPT, an impressive front panel that tilts, and the highest accuracy available achieving 0.015%+0.015%F.S., 0.04%+0.04%F.S., and 0.1%+0.1%F.S. accuracy for voltage, current and power measurement respectively - all with an incredibly high power density (6kW @4U).

Front panel tilts for painfree viewing and operation on 7, 10 & 13U models

- 3kW to 24kW units - parallel up to 480kW
- CC, CR, CV, CP and CZ modes
- User defined waveforms
- Standard USB or opt. Ethernet and GPIB interfaces

Test Instrumentation & Automated Test Systems

Instruments

AC Power Sources	Hipot Testers and Analyzers
Regenerative Grid Simulators	Wound Component Testers
Programmable DC Power Supplies	LCR Meters
AC & DC Electronic Loads	Milliohm Meters
Power Meters	TEC Controllers
Multimeters	Thermal Data Loggers

Automated Test Systems

Battery
EV/EVSE
PV Inverter
Power Conversion
Medical Device
LED Lighting and Driver
