

ESD Wastebasket Liners

Essential for static control

Reduce static potential with ACL ESD Wastebasket Liners. Unlike consumer trash bags, which can generate significant static charges and risk ESD events during disposal, ACL's liners are designed to be low-tribogenerating and perform consistently regardless of humidity.

Made from single-layer polyethylene, these anti-static liners deliver a static decay rate of under two seconds. They are amine-free, maintain stable electrical resistance, and are both non-corrosive and RoHS compliant, offering reliable and safe performance.

Ideal for the following applications:

- ESD protected areas
- Automated assembly lines

FEATURES:

- ❖ Small size 1.5 mil liners fit 5-7 gallon containers
- ❖ Tall size 1.5 mil liner fits 11-gallon containers (#5075 Wastebasket)
- ❖ Extra-large 2 mil liners fit 40 to 45-gallon containers
- ❖ Resistance (RTT) is between 10^{10} – 10^{12} ohms
- ❖ Low-density polyethylene
- ❖ Bottom seal; no gussets

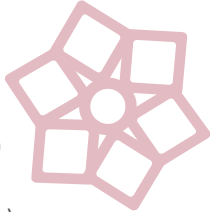

Product# 5079: Pink liner
Small; 24" x 24" (50 per bundle)

Product# 5076: Pink liner
Tall; 24" x 34" (50 per bundle)

Product# 5078: Pink liner
X-Large; 40" x 46" (25 per bundle)

Product# 5078C: Pink liner
X-Large; 40" x 46" (100 per bundle)

Product# 5079B: Black liner
Small; 24" x 24" (50 per bundle)

Product# 5076B: Black liner
Tall; 24" x 34" (50 per bundle)
