The Bevco Difference

Backless stools give workers the freedom to move, reposition, and work close to their workstations while taking up less visual and physical space than traditional chairs.

MORE MOBILITY

Allows users to move and reposition easily throughout the workday.

SPACE EFFICIENT

A streamlined design works well in compact workstations and production environments.

EASY TO POSITION

Slide the stool into the workstation when it's time to work and out of the way when it's not.

Configured for Your Work

Choose from a range of adjustments, heights, arms, bases, and casters.

Made in Wisconsin

American manufacturing backed by responsive customer support.

Lower Cost of Ownership

A seating investment designed for long-term value.

One Stool. Countless Work Environments.

MANUFACTURING

Efficient seating for
production and assembly work

CLEANROOMS

Purpose-built options for
controlled environments

LABORATORIES

Compact seating for
precision-focused tasks

EDUCATION

Flexible seating for classrooms,
labs, and learning environments

ELECTRONICS

Configurable solutions
for technical workstations

OFFICE

Simple, space-efficient seating
for everyday applications

Compact. Comfortable. Configurable.
Built for Demanding Work Environments.
