

*ESD-safe packaging*

6209HC1664

## *Prevent Electrostatic Damage In Cleanrooms & Other Critical Environments*

Mat and Benchtop Reconditioner Cleanroom Wipes  
clean and rejuvenate ESD-safe surfaces

- Cleans and rejuvenates burned or dead spots on ESD mats
- Alcohol free – will not dry mats
- Long-lasting dissipative protection – up to 30 days
- Effective in relative humidity below 15%
- High saturation – one wipe cleans large surface area
- Class 10 cleanroom laundered polyester wipes
- Mono-filament no-run construction and sealed edge to prevent loose fibers
- No lint, fiber or FOD
- Soft non-abrasive material

**NEW!** 6209HC1664

9"x9" (23cm x 23cm)  
100 wipes/bag

**Also available from Chemtronics:**

SIP125P1664

5"x7" (13cm x 18cm)  
125 presaturated wipes/tub

ES1664T

16 fl oz / 472 mL trigger spray

### Coventry™ High Precision ESD Static Control Swabs

#### Protects components from destructive static discharge

Swab handles dissipate 99% of a 5,000 volt (5 kV) charge in less than 2 seconds. Plastic alloy in the handles is inherently static dissipative. It contains no additives, coatings or surfactants and is effective at any level of humidity. Blue handles are extra resistant to solvents - even acetone. Choose between our Class 10 (M3, ISO 4) laundered polyester, microfiber or 100 pore-per-inch ultraclean polyurethane foam.

#### Sealed Polyurethane Foam ESD Swabs

**21050ESD** – 2.8" / 7.1cm L

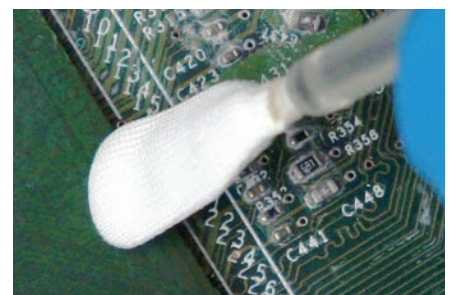

#### Wrapped Polyurethane Foam ESD Swabs

- Help you meet ANSI/ESD S20.20
- Handles dissipate 99% of 5kV charge in under 2 sec.
- Blue handles — more solvent resistant
- Clear handles — stronger, more rigid

#### ■ Applications:

- Sample preparation
- Sensor cleaning
- PCB cleaning
