Description

The AM4112NT Dino-Lite handheld microscope is a composite (AV/Video RCA output) model that connects directly to a television via the RCA/Component cables. Viewing objects in motion is where this model will excel with real time imaging, making inspection more efficient than before. This model uses the latest housing which incorporates: improved magnification dial movement for smooth and easy adjustment and focusing with the Dino-Lite, and a scroll lock feature for assuring desired set magnification/focus.
