## Description

The first eyepiece with the high quality Edge Series class optics and high-resolution sensor, the 5MP Dino-Eye Edge Series AM7025X offers remarkable image performance while providing a relatively larger field of view than its predecessors. The AM7025X design and included adapters allows for fitment within 23mm, 30mm, 30.5mm or c-mount eyepiece slots which can be fixed into ideal focal positions. With fine color reproducibility, the AM7025X is capable of capturing the finest details of a microscope's view for a wide range of professional applications
