Description

Alternate metal holster for all Dino-Lite handheld microscope cameras, with a thinner and sleeker design. The HD-M1 holster holds the Dino-Lite microscopes snugly at the location above the magnification dial with a thumbscrew. Simply by tightening the thumbscrew, you can secure the Dino-Lite onto the holster. This holster is great for all Dino-Lite stands or any custom designed stand with two different pole slots of 10mm and 8mm diameter.
