

# MSKM-01

\$399

## Product Images

## Description

The MSKM-01 is an optional attachment that allows control of the Dino-Lite microscopes focus knob without touching the device. It can be used in specific conditions when the Dino-Lite microscope has to be isolated during use, such as: using it in a hazardous environment, when integrated into a machine, used in an enclosed space, and etc. Controlling the Dino-Lite can be done by using a control box tethered to the MSKM-01 or use with DinoCapture 2.0 software. When using with DinoCapture 2.0, the knob motor can be controlled by the right and left mouse buttons similar to the MSKM-01's control box. MicroTouch on the control box works as a snapshot trigger to take pictures directly into the software. Motor: 12 V, 9.5 RPM

\*Note: MS35B, RK-10A, or RK-06A stand & Dino-Lite microscope required for use, sold separately

## Additional Information

Warranty Period	1 year
Manufactured in	Taiwan
Service & Support	U.S. ( <a href="http://www.dinolite.us">www.dinolite.us</a> ) English & Spanish
