Description

Designed for Dino-Lite: The MS35B is a versatile, lightweight and economical vertical stand with fine adjustment designed for use with the Dino-Lite handheld digital microscope cameras. It has a range of up to 10 inches of vertical working distance from object (up to 20 inches with the optional extension post: MSA2P). The main body assembly with built in fine adjustment slides up or down into position on the vertical post and can be rotated 360 degrees, then secured into position with a rear set screw. The Dino-Lite handheld microscope (not included) slides directly into a holster which is mounted onto a peg located on the main body. A ball and socket type peg allows for up to 45 degrees of adjustable lateral viewing angles while an optional, separate rigid vertical peg provides a dedicated straight-on view allowing for more accurate measurements. The precision machine crafted components provide smooth adjustment and positioning in a well balanced and stable ergonomic design. Manufactured from a combination of resilient stainless steel and lightweight recycled aluminum, the MS35B can easily and conveniently be moved from one work area to another and will endure the

Additional Information
