

## LUXOR MODULAR SOLUTIONS

### MBS-STR

## MODULAR STORAGE SYSTEM

Luxor's Modular Storage System offers an ideal solution for the organization and safekeeping of essential educational materials. Customizable, expandable, and sold in a full range of configurations, there's a model to suit the needs of any learning space perfectly.

Highlights include a removable whiteboard side panel, a removable pegboard side panel (perfect for organizing STEM and maker space supplies), sturdy MDF tabletops that add usable work and storage space, plus smooth-rolling, lockable casters that make transporting supplies between classrooms easy.

Best of all, the system features Luxor's MBS-series removable and stackable storage bins, which make it a snap to keep classroom supplies readily at hand as teachers move from room to room and students transition from activity to activity.

The bins are cross-compatible with other Luxor MBS-series products, such as our MBS student desks, student chairs, or teacher cart (sold separately).

Easy to assemble, each cabinet module holds up to three 6"-deep storage bins, six 3"-deep storage bins, or a combination of the two sizes. To best suit your space, choose an individual module, or from a selection of multiple-module configurations that are stacked two-high, connected side-by-side, or a combination of vertical and horizontal connections. All models include an extra set of horizontal connection hardware (for side-by-side connection of additional modules) in case your needs expand in the future.

#### DIMENSIONS:

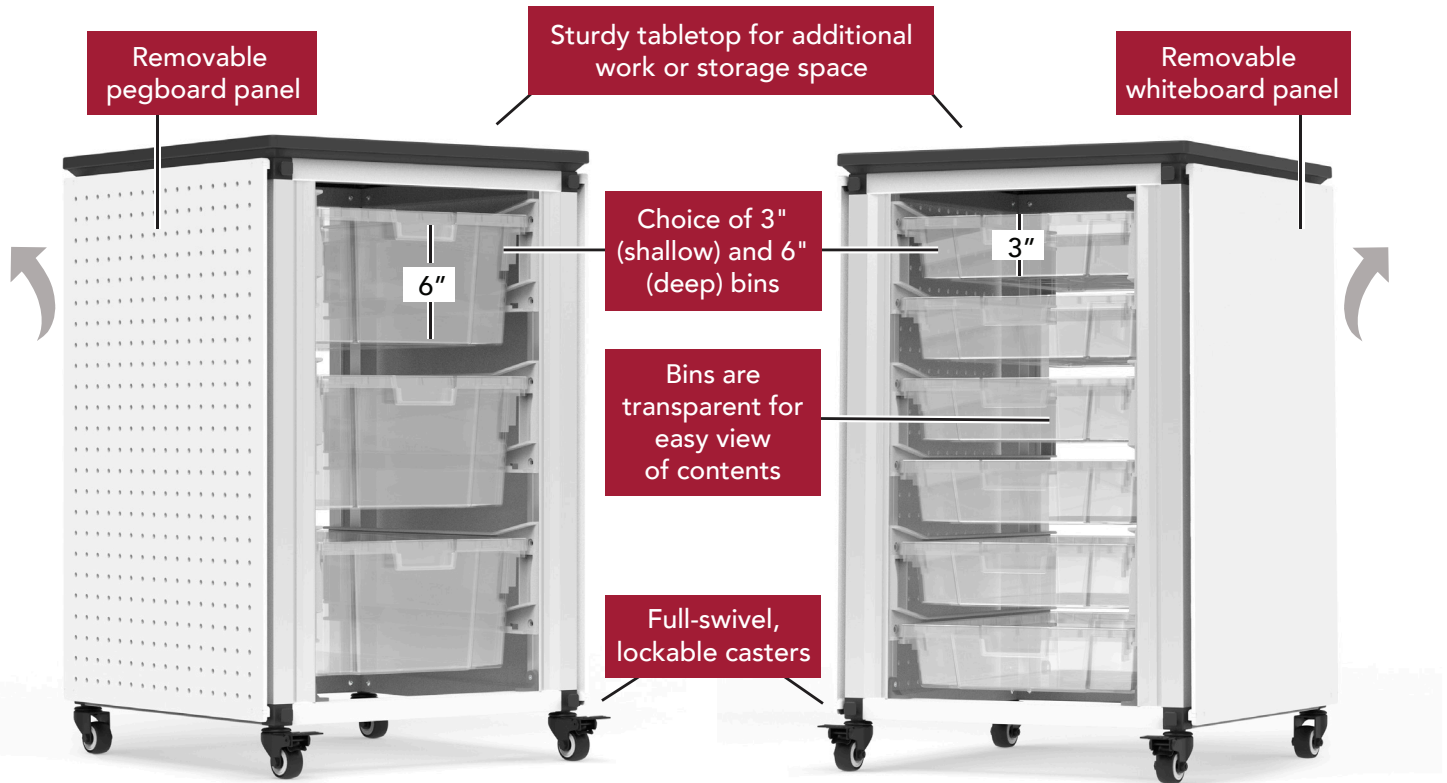

- Overall dimensions (single module): 18.2" x 18.2" x 28.75"
- Dimensions, small bins: 12.25"W x 16.75"D x 3"H (each)
- Dimensions, large bins: 12.25"W x 16.75"D x 6"H (each)

#### Features:

- Each module lets you organize and stack supplies in six removable 3"-deep bins, or three removable 6"-deep bins
- Steel frame for durability
- Bins hold up to 20 lbs. each
- Bins are made of clear plastic, making it easier to see their contents
- Built-in safety feature prevents bins from accidentally pulling off their tracks
- Bin handles include ticket inserts for standard labels
- Tabletop surface provides a supplemental work area
- Included dry erase whiteboard side panel for sharing of ideas
- Included pegboard side panel provides additional option for organization of supplies
  - 1/4" holes spaced 1" apart (center to center)
  - Compatible with standard pegboard hooks, loops, and bins
- Included hardware ensures secure connections between modules
- Full-swivel casters for maneuverability; casters with locking brakes (up to two per module) offer stability for stationary use
- Additional storage bins are available in packs of eight small or four large tubs
