

IT'S TIME TO UPGRADE FROM MX-500 TO MX-5200

Increase your productivity and performance with MX-5200, offering twice the power of MX-500!

THE KEY ADVANTAGES OF MX-5200 OVER MX-500

Power	With 80W, MX-5200 has twice the power of the MX-500, resulting in stable soldering, improved performance, and the ability to handle high thermal demand applications
Ports	The Dual Port Simultaneous Mode in the MX-5200 allows the operator to use both ports at the same time
Cartridges & Accessories	Ability to utilize cartridges and accessories from old systems with new MX-5200
Ergonomic Handpiece	New light-weight, aluminum MX-5200 handpiece optimizes power delivery to the tip, offers improved temperature control, delivers fast heat-up speeds, & works with customized high thermal demand geometries
Work Stand*	The work stand for the MX-5200 has an adjustable sleep mode
Digital Display*	MX-5200's digital display shows the active port and power meter
Ground Fault Interrupt*	The AC ground monitor in the MX-5200 detects power line ground failures, and immediately alerts the operator and shuts down the system

*Specific to legacy MX-500P systems
