SUBJECT: BVX REPLACEMENT FILTERS

Dear Valued Customer:

As has been reported in local and world news outlets, there have been a number of challenges for supply sourcing of certain products and materials.

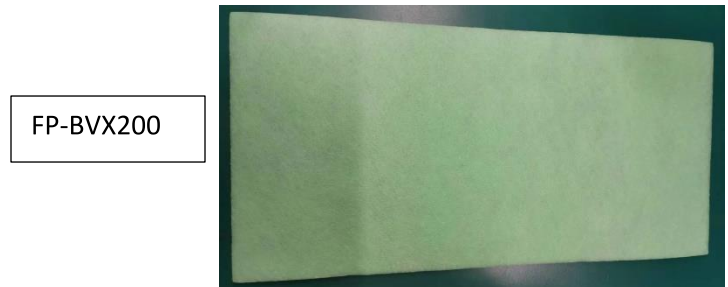

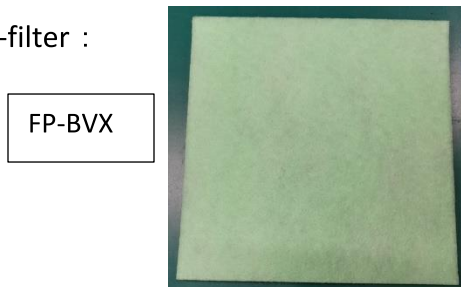

Due to this current challenging climate for supply chain sourcing and in order to avoid a long term supply shortage for certain part numbers OK-Metcal has added a 'Second alternative materials source' for the following BVX replacement filter part numbers:

P/N FP-BVX	(PRE-FILTER, BVX-100/101/103)
P/N FM-BVX	(MAIN HEPA FILTER, BVX-100/101)
P/N FP-BVX200	(PRE-FILTER, BVX-100/101/103)
P/N FM-BVX200	(MAIN HEPA FILTER, BVX-100/101)

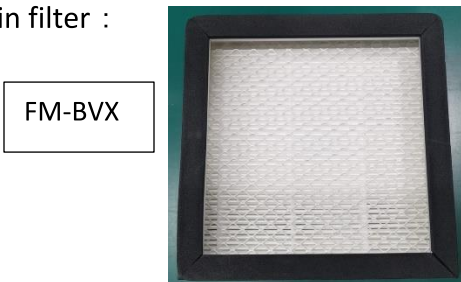

The products from '2<sup>nd</sup> materials source' may have slightly different visual appearance (including different colors) compared to original products but form, fit & function has been fully tested to and meet product requirements as verified and approved by our Engineering/Product Team
