

Big Performance. Surprisingly Light on Price & Size.

Have it all with the New Tektronix RSA306. Starting at \$3,490.

Included Standard:

9 kHz to 6.2 GHz frequency range

-160 dBm to +20 dBm dynamic range

40 MHz capture bandwidth

17 automated measurements

Made in the USA

1-year warranty

The new RSA306 spectrum analyzer might be small but it packs a big punch. It comes loaded with features you'd expect from spectrum analyzers two times the price* - including real-time architecture and patented DPX[®] technology. And, the convenient size gives you unlimited flexibility. Big things do come in small packages.

*\$3,490 includes USB spectrum analyzer; laptop/tablet not included.

Tektronix[®]

Tektronix RSA306

POWERFUL MEETS INTUITIVE for only \$3,490.

The architecture of the RSA306 is remarkably powerful. Unlike traditional spectrum analyzers, the advanced DPX[®] technology captures more traces per second for the most accurate view of your signals. Enabling you to discover and characterize even the most infrequent and intermittent events.

Powered by SignalVu[®] Essentials software your possibilities are unlimited. Get advanced measurement and analysis capabilities that you can save, customize or share with – access is unlimited. All in an interface that is powerful as it is intuitive.

Every RSA306 ships with a free copy of SignalVu Essentials. Additional powerful, advanced analysis options are available to customize your solution. Priced at just \$990 each.

- AM/FM/PM/Direct Audio Analysis
- Settling time
- General Purpose Modulation Analysis
- Advanced pulse analysis
- P25 compliance testing and analysis
- Flexible OFDM analysis
- WLAN
 - 802.11 a/b/g/j/p
 - 802.11n
 - 802.11ac
- Mapping and Signal Strength (\$2,490)
