

MSATP

Arm Protection with Long Wear Life

APPLICATIONS

- Automotive
- Construction
- General Purpose
- Material Handling
- Packaging
- Warehouse

WITHOUT THUMBHOLE

WITH THUMBHOLE

FEATURES

For moderate cut and abrasion hazards that extend beyond the hands, look to the MSATP sleeve. With ATA® fiber technology, this 13 gauge, light weight sleeve delivers ANSI level A2 cut resistance. The addition of an elastic band at the wrist helps the sleeve stay comfortably in place all day long. A combination of good abrasion resistance, the dirt-hiding heather gray color, and outstanding laundering characteristics means the MSATP provides an extended wear life, making it a great value in full arm cut protection. The sleeve is available in any length, with or without thumbholes.

ATTRIBUTES

STYLE	Seamless knit
GAUGE	13 g. light weight
ANSI CUT	A2
SIZES	8" to 24" with and without Thumbhole
FIBER CONTENT	ATA® fiber technology
COLORS	Gray
