

AF-FMD-200 (Hand Held Mini Fiber Microscope)

Product: AF-FMD-200

Date: July:2009

Rev: 01

Description

Advanced Fiber Solutions is please to announce the availability of the AF-FMD-200 mini hand held fiber microscope. The AF-FMD-200 is designed to inspect fiber termination ends, providing the most critical view of the fiber end face. This mini scope is smaller, lighter and easier to carry than a standard hand held scope. The AF-FMD-200 has two separate light modes, co-axial LED mode for direct viewing of the end face and oblique LED mode for angle viewing of the end face.

Kit Highlights and Key Features

◦ Small, compact and hand held	◦ 2.5mm adapter standard
◦ Dual light mode – co-axial and oblique	◦ 1.25mm adapter available
◦ 200 power standard	◦ Auto off function
