### **Autonics**

# 2-Phase Closed-Loop Stepper Motor Ai-M SERIES

# INSTRUCTION MANUA

Thank you for choosing our Autonics product Please read the following safety considerations before use.

## ■ Safety Considerations

\*\*Please observe all safety considerations for safe and proper product operation to avoid

 $\times \Delta$  symbol represents caution due to special circumstances in which hazards may occur.

**Warning** Failure to follow these instructions may result in serious injury or death. ▲ Caution Failure to follow these instructions may result in personal injury or product damage

1. Fail-safe device must be installed when using the unit with machinery that may cause serious injury or substantial economic loss. (e.g. nuclear power control, medical equipment, ships, vehicles, railways, aircraft, combustion apparatus, safety equipment, crime/disaster prevention devices, etc.)

Failure to follow this instruction may result in personal injury, or product and ambient equipment

- Failure to follow this instruction may result in fire, personal injury, or economic loss. 2. Fix the unit on the metal plate.
- Failure to follow this instruction may result in personal injury, or product and ambien damage.

  3. Do not connect, repair, or inspect the unit while connected to a power source. Failure to follow this instruction may result in fire.

  4. Install the unit after considering counter plan against power failure. Failure to follow this instruction may result in personal injury, or economic loss.

  5. Check 'Connections' before wiring.
  Failure to follow this instruction may result in fire.

  Do not disassemble or modify the unit

- 6. Do not disassemble or modify the unit.
- Failure to follow this instruction may result in fire

- Failure to follow this instruction may result in fire.

  7. Install the motor in the housing or ground it.
  Failure to follow this instruction may result in fire, or personal injury.

  8. Make sure to install covers on motor rotating components.
  Failure to follow this instruction may result in personal injury.

  9. Do not touch the unit during or after operation for a while.
  Failure to follow this instruction may result in burn due to high temperature of the surface.

  10. Turn OFF the power directly when error occurs.
  Failure to follow this instruction may result in fire, or personal injury.

## **⚠** Caution

- 1. Use the unit within the rated specifications.
  Failure to follow this instruction may result in fire or product damage.
  2. Use dry cloth to clean the unit, and do not use water or organic solvent.
  Failure to follow this instruction may result in fire.
- Do not use the unit in the place where flammable/explosive/corrosive gas, direct sunlight, radiant heat, vibration, impact, or salinity may be present.
- Failure to follow this instruction may result in fire or explosic
- 4. The motor may overheat depending on the environment.

  Install the unit at the well-ventilated environment and forced cooling with a cooling fan. Failure to follow this instruction may result in product damage and degr

### Specifications

Model	Ai-M-42SA	Ai-M-42MA	Ai-M-42LA
Max. holding torque <sup>*1</sup>	2.55kgf·cm (0.25N·m)	4.08kgf·cm (0.4N·m)	4.89kgf·cm (0.48N·m)
Rotor moment of inertia	35g·cm² (35×10 <sup>-7</sup> kg·m²)	54g·cm² (54×10 <sup>-7</sup> kg·m²)	77g·cm² (77×10 <sup>-7</sup> kg·m²)
Rated current	1.7A/Phase		
Resistance	1.7Ω/Phase ±10%	1.85Ω/Phase ±10%	2.1Ω/Phase ±10%
nductance	1.9mH/Phase ±20%	3.5mH/Phase ±20%	4.4mH/Phase ±20%
Weight <sup>**2</sup>	Approx. 0.45kg (approx. 0.34kg)	Approx. 0.52kg (approx. 0.41kg)	Approx. 0.59kg (approx. 0.48kg)

### • Frame size 56mm

Model	Ai-M-56SA	Ai-M-56MA	Ai-M-56LA
Max. holding torque*1	6.12kgf·cm (0.6N·m)	12.24kgf·cm (1.2N·m)	20.39kgf·cm (2.0N·m)
Rotor moment of inertia	140g·cm <sup>2</sup> (140×10 <sup>-7</sup> kg·m <sup>2</sup> )	280g·cm² (280×10 <sup>-7</sup> kg·m²)	480g·cm <sup>2</sup> (480×10 <sup>-7</sup> kg·m <sup>2</sup> )
Rated current	3.5A/Phase		
Resistance	0.55Ω/Phase ±10%	0.57Ω/Phase ±10%	0.93Ω/Phase ±10%
Inductance	1.05mH/Phase ±20%	1.8mH/Phase ±20%	3.7mH/Phase ±20%
Weight <sup>×2</sup>	Approx. 0.76kg (approx. 0.62kg)	Approx. 0.99kg (approx. 0.85kg)	Approx. 1.36kg (approx. 1.22kg)

#### • Frame size 60mm

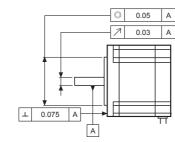

Model	Ai-M-60SA	Ai-M-60MA	Ai-M-60LA
Max. holding torque <sup>*1</sup>	11.22kgf·cm (1.1N·m)	22.43kgf-cm (2.2N-m)	29.57kgf·cm (2.9N·m)
Rotor moment of inertia	240g·cm² (240×10 <sup>-7</sup> kg·m²)	490g·cm2 (490×10-7kg·m2)	690g·cm2 (690×10-7kg·m2
Rated current	3.5A/Phase		
Resistance	1.0Ω/Phase ±10%	1.23Ω/Phase ±10%	1.3Ω/Phase ±10%
Inductance	1.5mH/Phase ±20%	2.6mH/Phase ±20%	3.8mH/Phase ±20%
Weight <sup>**2</sup>	Approx. 0.89kg (approx. 0.75kg)	Approx. 1.27kg (approx. 1.13kg)	Approx. 1.58kg (approx. 1.44kg)

- X1: Max. holding torque is maintenance torque of stopping the motor when supplying the rated current (2-phase excitation) and is the standard for comparing the performance of motors.
  X2: The weight includes packaging. The weight in parenthesis is for unit only.

Standard ste	ep angle	1.8° / 0.9° (Full/Half step)		
Motor phase		2 phase		
Run method		Bipolar		
Insulation cla	ass	B type (130°C)		
Insulation re	sistance	Over 100MΩ (at 500VDC megger) between motor coil-case		
Dielectric str	ength	0.5kVAC 50/60Hz for 1 min between motor coil-case		
Vibration		1.5mm amplitude at frequency of 10 to 55Hz (for 1 min) in each X, Y, Z direction for 2 hours		
Shock		Approx. max. 50G		
Environment	Ambient temperature	0 to 50°C, storage: -20 to 70°C		
Environment	Ambient humidity	20 to 85%RH, storage: 15 to 90%RH		
Approval		C€		
Protection st	tructure	IP30 (IEC34-5 standard)		
Stop angle e	error <sup>×1</sup>	±0.09°		
Shaft vibration	on <sup>*2</sup>	0.03mm T.I.R.		
Radial Move	ment <sup>*3</sup>	Max. 0.025mm (load 25N)		
Axial Moven	nent <sup>**4</sup>	Max. 0.01mm (load 50N)		
Concentricity for shaft of setup in-low		0.05mm T L R		
Concentricity	for snart of setup in-low	0.0011111 11111 11		

\*2: T.I.R. (Total Indicator Reading)

tes total quantity of dial gauge in case of 1 rotation of measuring part around the reference O 0.05 A 7 0.03 A

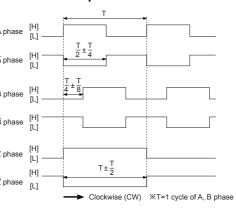

X3: Amount of radial shaft displacement when adding a radial load (25N) to the tip of the motor shaft.
 X4: Amount of axial shaft displacement when adding a axial load (50N) to the shaft.
 Environment resistance is rated at no freezing or condensation.

## ○ Encoder

## ■ Troubleshooting

- ①Check the connection status between controller and driver, and pulse input specifications (voltage, width)
- ©Check the pulse and direction signal are connected correctly.

  2. When motor rotates to the opposite direction of the designated direction
- ①When RUN mode is 1-pulse input method, CCW input [H] is for forward, [L] is for backward. When RUN mode is 2-pulse input method, check CW and CCW pulse input are changed or not.
- When motor drive is unstable
- ①Check that driver and motor are connected correctly. ②Check the driver pulse input specifications (voltage, width).

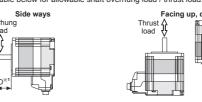

#### ■ Motor Installation

### 1. Mounting direction

Motor can be mounted in any directions-facing up, facing down and side ways.

No matter which direction motors to be mounted, make sure not to apply overhung or thrust load

Refer to the table below for allowable shaft overhung load / thrust load.

X1: The distance from the shaft in front (mm

Motor size	The distance from the shaft in front (mm), Allowable overhung load [kgf (N)]				Allowable
WOLDI SIZE	D=0	D=5	D=10	D=15	thrust load
Frame size 42mm	2 (20)	2.6 (25)	3.5 (34)	5.3 (52)	
Frame size 56mm	5.5 (54)	6.8 (67)	9.1 (89)	13.3 (130)	Under the load of motor
Frame size 60mm	5.5 (54)	0.0 (07)	9.1 (09)	13.3 (130)	load of motor

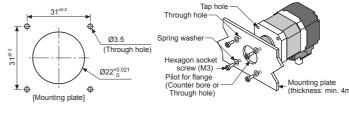

Do not apply excessive force to motor cable when mounting motors

Do not forcibly pull or insert the cable. It may cause poor connection or disconnection of the cable by force.

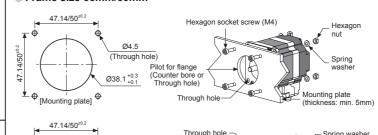

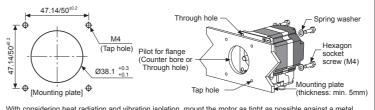

## 2. Mounting method

#### ○ Frame size 42mm

#### ○ Frame size 56mm/60mm

With considering heat radiation and vibration isolation, mount the motor as tight as possible against a metal panel having high thermal conductivity such as iron or aluminum When mounting motors, use hexagon socket screws, hexagon nuts, spring washers and flat washers. Refer to the table below for allowable thickness of mounting plate and using bolt.

## 3. Connection with load

Do not draw the wire with over strength 30N after wiring the encode

When connecting the load, be sure of the center, tension of the belt, and parallel of the pulley. When connecting the load such as a pulley, a belt, be sure of the allowable thrust load, radial load, and shock. Tighten the screw for a coupling or a pulley not to be unscrewed. When connecting a coupling or a pulley on the motor shaft, be sure of damage of the motor shaft and the motor shaft bearing. Do not disassemble or modify the motor shaft to connect with the load.

l	Direct load connection with coupling	Load connection with pulley, belt, and wire	Load connection with gear	
	Flexible coupling Ball screw or TM screw  **Use Autonics flexible coupling (ERB Series).			
ı	1	I .	1	- 1

The motor shaft and the load shaft The motor shaft and the load shaft

### 4. Installation condition

Install the motor in a place that meets certain conditions specified below. It may cause product damage if it is used out of following conditions.

①Inside of the housing which is installed indoors

(This unit is manufactured for the purpose of attaching to equipment. Install a ventilation device.)

Within 0 to 50°C (at non-freezing status) of ambient temperature

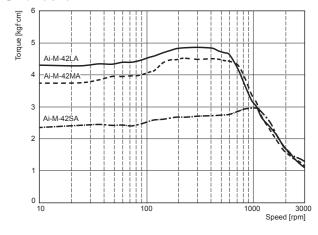

When connecting the load directly (ball screw, etc) to the motor shaft, use a flexible coupling as shown in the above figure. If the center of the load is not aligned with that of shaft, it may cause severe vibration, shaft damage or shorten life cycle of the shaft bearing.

The motor shaft and the load shaft should be parallel. Connect the motor shaft and the line which connects the center of two pulleys to a right angle.

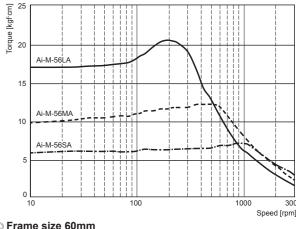

- ③Within 20 to 85%RH (at non-dew status) of ambient humidity
- The place without explosive, flammable and corrosive gas
   The place without direct ray of light
   The place where dust or metal scrap does not enter into the unit
- The place without contact with water, oil, or other liquid The place without contact with strong alkali or acidity
- The place where easy heat dissipation could be made
- The place without continuous vibration or severe shock
- @The place with less electronic noise occurs by welding machine, motor, etc ®The place where no radioactive substances and magnetic fields exist. It shall be no vacuum

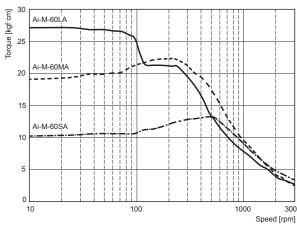

## ■ Motor Characteristics

#### Frame size 42mm

### Frame size 56mm

## Cautions during Use

- 1. Follow instructions in 'Cautions during Use'.
- Otherwise, it may cause unexpected accidents.
- 2. Using motors at low temperature may cause reducing ball bearing's grease consistency and friction torque is increased.
- Start the motor in a steady manner since motor's torque is not to be influenced.
- . If wiring encoder cable, separate it from high voltage line or power cable for preventing surge and inductive noise. The cable length should be as short as possible. Failure to follow this instruction may result in raised cable resistance, residual voltage, and output waveform noise
- 4. Must connect the encoder shield cable to the F.G. terminal.
- 5. For using motor, it is recommended to maintenance and inspection regularly.  $\ensuremath{\textcircled{\upomega}}$  Unwinding bolts and connection parts for the unit installation and load connection ②Strange sound from ball bearing of the unit
- ③Damage and stress of lead cable of the unit 4) Connection error with driver ⑤Inconsistency between the axis of motor output and the center, concentric (eccentric,
- declination) of the load, etc. 6. This unit may be used in the following environments.
- ①Indoors (in the environment condition rated in 'Specifications')
- ②Altitude max. 2.000m ③Pollution degree 2
- (4) Installation category II

## Major Products
