

E-Z Grip Black

Stainless Steel Tweezers infused with a PVD Bond

Crafted from **anti-magnetic & anti-acid 304 stainless steel**, these tweezers are designed to withstand the rigors of daily use while maintaining their precision.

The tweezer's elegant black finish is achieved through a sophisticated **Physical Vapor Deposition (PVD) process**, which fuses a virtually chip resistant bond to the surface.

This advanced technique not only enhances the aesthetic appeal but also imparts superior scratch and corrosion resistance, ensuring the tweezer's longevity and reliability.

The **unique Diamond Pattern Grip** is engineered for enhanced comfort and control.

EZ Grip Black Tweezers
