

Description: A fast-setting patch system for making permanent, waterproof field repairs.

Patching PVC/ABS piping, tanks, vessels, and containers. Repairing all substrates with a 1 hour functional cure.

Product features:

Intended Use:

Low odor technology Room temperature cure Non-sagging formula Bonds dissimular substrates Minimal surface preparation Strong adhesion

Limitations:

Typical Physical Properties: Technical data should be considered representative or typical only and should not be used for specification purposes. Cured 7 days @ 75°F

mining			

Mixing Instructions:

Application Instructions:

Zip Patch requires minimal surface preparation. However, for maximum adhesion, the repair surface should be roughened and wiped clean with solvent. When making repairs to pipes, shut down the pressure. In tanks, pressure should be relieved by lowering the fluid level.

Apply only in well-ventilated areas. The Zip Patch kit contains everything required to make fast, permanent emergency repairs. First, carefully peel away one side of the foil pouch. Then spray the exposed patch surface lightly, but completely, (including the corners) with activator. Proper activation is indicated by the patch becoming darker in color.

Press the activated patch over the repair area and carefully peel back the remaining foil. Use the plastic applicator

	provided in the kit to eliminate entrapped air by gently smoothing the patch from the center toward the outer edges. Complete activation of the adhesive by spraying the entire surface of the exposed patch.		
Storage:	Store between 55F and 75F. Continuous storage above 75F reduces the shelf life of the materials. Prolonged exposure above 100F quickly diminishes the product's reactivity, and should be avoided. Shelf life can be extended by refrigeration between 45F and 55F. DO NOT FREEZE.		
Compliances:	None		
Chemical	Chemical resistance is calculated with a 7 day, room temp. cure (30 days immersion) @ 75%)		
Resistance:	Cutting Oil Excellent		
	Gasoline (Unleaded) Very good		
	Glycols/Antifreeze Very good		
Precautions:	Please refer to the appropriate material safety data sheet (MSDS) prior to using this product.		
	For technical assistance, please call 1-800-933-8266		
	FOR INDUSTRIAL USE ONLY		
Warranty:	Devcon will replace any material found to be defective. Because the storage, handling and application of this material is beyond our control, we can accept no liability for the results obtained.		
Disclaimer:	All information on this data sheet is based on laboratory testing and is not intended for design purposes. ITW Devcon makes no representations or warranties of any kind concerning this data.
