

CIRCULAR RING PLIERS

Durable hinge allows tool to open 180°.

Pads are easily replaceable.

CIRCULAR RING PLIERS

The DRPXX circular ring pliers are specifically designed to grip circular connector and backshell components which would be deformed by other gripping methods. The non marring rubber jaw lining material is available in strip form and may be used to replace worn jaw inserts. It is held in place by interlocking fingers which are molded into the material.

The following chart defines the working diameters and the tools which are available in this series.

Replacement Pads for Circular Ring Pliers are available (P/N DRP-RS-1). This replacement pad is supplied as a 4.25" strip that must be cut to length needed.
