

# Soldering Station Xchange Program

Replace your current Stations for free

**i-CON NANO MK2**  
List Price: \$ 373.50

Fast heat-up/reheat  
and up to 20% more  
heating power

Fast tip exchange  
in record time via  
Tip'n'Turn

Retrofittable to  
preceding stations

Longer lifetime due  
to standby sensor

**i-CON 1 MK2**  
List Price: \$ 613.50

**+20%**  
Performance

The latest Ersa i-TOOL generation with 20% more soldering power is one of the smallest and most powerful fine soldering irons in the market. The high-performance heating element supplies 150 W of heating power ensuring fast heat-up and recovery.

**TIP'N'  
TURN**

The patented Tip'n'Turn concept enables the tip to be changed in the blink of an eye. Thanks to the bayonet lock, the heating element is kept intact – only the tip is changed; in record time! This saves costs and resources.

## Program Details:

- Replace your current stations with an Ersa i-CON NANO MK2 or i-CON 1 MK2
- Replacement is a "1 for 1" swap at \$ 0.00 cost to you!
- Save costs long term on consumables
