

Product Update Announcement

Date: November 2024

Fluke 177X – Included iFlex® Current Clamps now 18” (previously 24”)

Following customer feedback, our 177X Power Quality Analyzers now ship with 18” iFlex® current clamps (I17XX-FLEX1500/18).

These shorter length current clamps provide improved ease of use and installation, addressing customer feedback about the unwieldiness of the longer version in space-constrained applications.

Should a larger current clamp be required, our 24” variant is still available to order separately.

Impacted SKUs	Previously Included	Now Include
