9190-INSTC

TC insert, 9190A, RADIAL GROOVES, WITH INSULATOR

Highlights

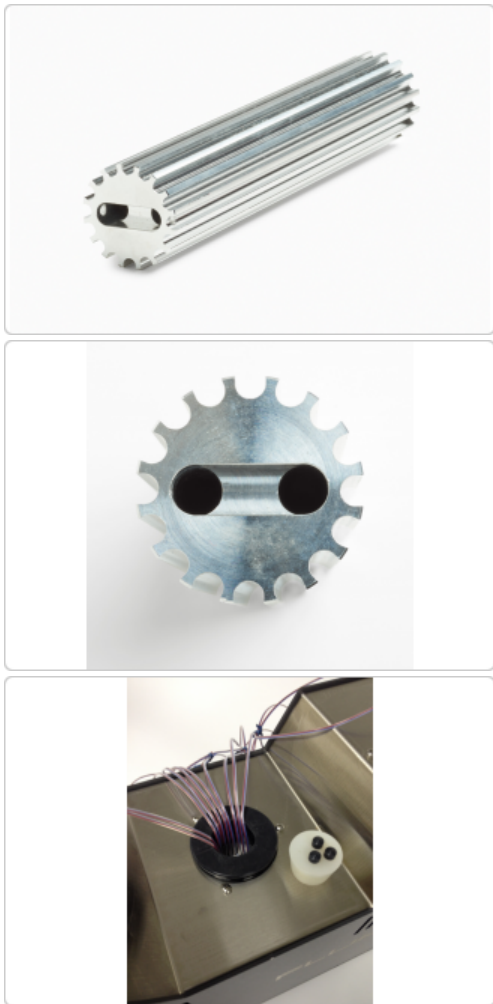

This insert is designed for use with the 9190A Ultra-Cool Field Metrology Well.

This insert is designed for bare/open tip wire style sensors. Each slot accepts most standard wire gauge sensors. This helps to maximize the quantity of sensors being tested and improves your testing by providing a dedicated radial groove for each sensor. Two 1/4 inch reference holes are also provided. An insulator plug is also included and helps to keep moisture out and the coolness in well. The insulator plug also includes plugged holes for the reference holes.

Specifications

Holes: 1/4 in (2), outer radial grooves (16)
