

Franklin Electric
GRID SOLUTIONS

360° BATTERY MANAGEMENT

Reliable power is essential. Franklin Electric's comprehensive battery management solutions combine cutting-edge battery monitoring systems, advanced battery testers, and intuitive asset management software. Together, these tools provide a complete approach to ensuring the health and performance of your batteries, enabling proactive maintenance and uninterrupted power delivery.

CELLTRON™ ADVANTAGE DIGITAL BATTERY TESTER

The CELLTRON™ Advantage Digital is a fast, user friendly, premium handheld tester for measuring battery conductance, voltage, temperature and strap resistance in high-noise environments for a complete battery state-of-health analysis. With this lightweight handheld tester, users can quickly conduct a full battery performance assessment and wirelessly upload to the UNITE™ Asset Management software for centralized data storage, proactive maintenance planning, and compliance reporting.

CELLGUARD™ WIRED BATTERY MONITORING SYSTEM

The CELLGUARD™ wired Battery Monitoring System (BMS) delivers economical, yet highly accurate and reliable remote health analysis of UPS system batteries in applications with high electromagnetic noise. Personnel are provided with continuous 24/7 monitoring of key battery performance indicators to help enable proactive maintenance, ensure battery performance, and deliver uninterrupted power when it matters the most. Ideal for all mission-critical DC power plants including UPS systems.
