

THE ERGONOMICS LEADER

GTSD-1930 SABER STRIPPER - DRILL MOUNTED STRIPPING TOOL

FASTER. SAFER. EASIER.

FASTER

- **90% faster** than a knife
- **70% faster** than a manual stripper*
- Hex design allows for quick connect to drill

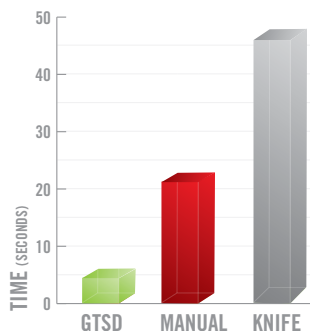

SAFER

- Decreases the muscle effort used to operate
- Eliminates repetitive movement of the forearm
- Hidden blade to eliminate risk of lacerations

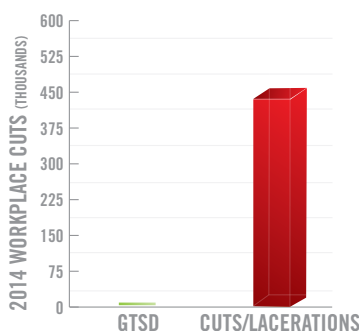

EASIER

- Less than 1lb added to drill
- Spring loaded retention pin for quick bushing attachments

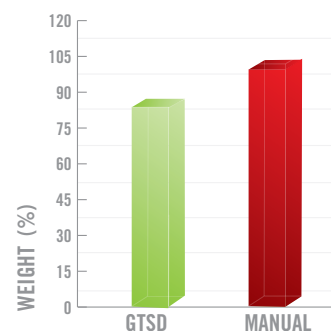

*The GTSD was compared to a competitor's tool and a knife blade with similar wire sizes and cutting depths.

FASTER

SAFER

EASIER

Productivity:
Increase productivity with faster set up time and higher cutting speeds for maximum efficiency when stripping multiple cables.

Injury Reduction:
The drill mounted design eliminates repetitive motions, letting the tool do the work.

Safety:
Approximately 70% of all laceration and cuts found in the workplace are on the fingers and hands.* The hidden blade protects the worker from accidental lacerations.

Accountability:
The tension grip depth stop insures precision cut back depth.
