Description/Title:

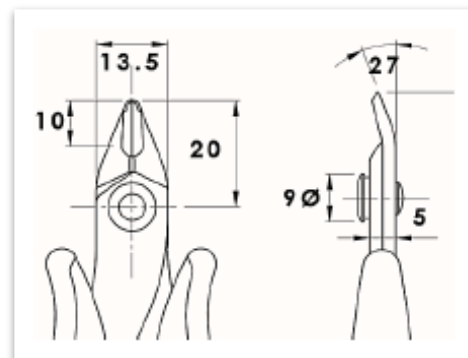

New INOX Steel version TR-25 Cutter

Part No:

TR-25-X

Specification:

Part No.	TR-25-X
Cut Type	Flush
Cutting Capacity	1.3mm \varnothing (16 AWG) copper wire
Material	INOX Steel
Steel Thickness	2.5mm (0.098 in.)
Overall Length	Approx. 138mm (5.4 in.)
Weight	75g (2.6 oz.)

Comments:

The new TR-25-X cutter is made from a special high-quality INOX steel which undergoes a heat treatment in a controlled atmosphere and is well suited for use in cleanroom environments. The cutting edges have a hardness rating of approximately 54HRC, and the cutter features the ergonomic dolphin grip, which provides a comfortable anti-slip handle that reduces strain on the user's hand when cutting, and an integrated return spring to minimize hand fatigue. An ESD Safe version of the tool is available.

NOTE: This tool is not suitable for sterilization in an autoclave.
