Product Description

The cradle mount with screw attachment goes on with a screw and T-nut and is ideal for routing wires in industrial applications where rework and adjustments are common. Mount features a 0.24" cradle opening for cable retention. The cradle arms can temporarily hold wires for simple adjustments and cable additions and protect against abrasion and cable damage. To permanently mount the bundle, the EZ Feed cable tie slot eliminates common obstructions for faster completion. During rework, the CutZone prevents wire damage when cutting off cable ties.
