

Sleeves for NP105

N1738

The sleeves for [NP105](#) suit the position of user's fingers in order to provide a greater control of tool.

They are adaptable to each arm of nanotweezers and offer a pleasant and comfortable grip which facilitates the handling of any small or microscopic SMD component.

The sleeves designed with a soft and non-slip material are also ESD safe.

They are supplied mounted to [NP105](#) but can also be purchased separately.
