Nozzle Replacement

The bayonet system makes it easy to change the nozzle.

To do this, hold the tube with one hand. With the other hand, turn the nozzle counter-clockwise. Then, pull the nozzle to remove it.

To install a new nozzle, align the bayonet, insert the new nozzle, and turn the nozzle clockwise to lock it in place.

The nozzles are designed in such a way that they can be used with a hanging arm or be lying on the workbench.
