New from JDV Products, Inc.

WG300 / WG400 Pneumatic Wire Wrap Tool

(Shown with WS500 Cut and Strip Attachment)

JDV Products Inc. has introduced the WG Series of pneumatic powered wire wrapping tools. These tools are designed for heavy-duty 18 AWG wire wrapping applications and are also an ideal tool for delicate 32 AWG work. The air powered tools' smoother start up, as compared to the electric and manual tools results in a higher quality wrap and less operator fatigue in high production wrapping applications. Two models are available.

The [WG300](#) is a perfectly balanced, lightweight trigger activated tool.

The [WG400](#) is a triggerless, ergonomically designed tool that simplifies the wrapping operation, reduces the potential for motion injuries such as Carpel Tunnel Syndrome and increases operator productivity.

Accessories such as Air Regulating System, Air Logic Controller and the [WS500](#) cut and strip attachment are also available.
