Versatility comes standard.

A MARKET LEADER IN DATA ACQUISITION SWITCH UNITS (DAQs)

Keysight's 34970A/72A DAQs empower you to gather a wider range of measurements with greater efficiency and precision. Built-in signal conditioning provides more measurement capabilities while noise reduction offers even greater signal fidelity. And BenchLink Data Logger software allows you to scan, monitor, control and analyze your data so you can quickly act on it. With these features, it's no surprise that these DAQs continue to be the number one choice of engineers everywhere.

HARDWARE + SOFTWARE + PEOPLE = INSIGHTS

34970A and 34972A Data Acquisition Switch Units

$6\frac{1}{2}$ digit (22-bit) with ultra-low reading noise (140 dB CMRR)

Measure up to 60 differential channels and 300 volts

Built-in signal conditioning measures 11 functions

Up to 32 MB readings of non-volatile USB memory

Access your 34972A DAQ remotely with FREE 3-in-1 WiFi router*
