

# What is the difference between the N7907A and N7910A rack mount kits?

## Frequently Asked Questions (FAQs)

### Summary

This FAQ outlines the difference between the two N6900/N7900 rack mount kits.

### Question

What is the difference between the N7907A and N7910A rack mount kits?

### Answer

The difference between these two kits is that the N7907A uses the older Quartz Grey color while the N7910A uses the new darker Phantom Grey color. The individual parts in the kit are listed in the table below. This table is also available in the N6900/N7900 Series Operating and Service Guide.

Items Supplied	Keysight N7910A part number
2 pair – Slide rails	5003-1128
2 – 1U rack ears for 1kW units or power dissipator units	5003-2347
2 – 2U rack ears for 2kW units	1CM110A
8 – Clip-nuts for attaching to rack frame (10-32)	0590-0804
4 – Fixed slide attachment screws (10-32 x 0.5)	2680-0104
4 – Movable slide attachment screws (M4 x 12 mm)	0515-1013
6 – Front ear attachment screws (M3 x 8 mm)	0515-0372
4 – Front dress screws (10-32 x 0.625)	3030-1768

Note the highlighted items above are different for the N7910A due to the color change. The equivalent N7907A parts in Quartz Grey are listed below.

2 – 1U rack ears for 1kW units or power dissipator units	5002-2816
2 – 2U rack ears for 2kW units	5063-9212
4 – Front dress screws (10-32 x 0.625)	0570-1577
