KLEIN TOOLS

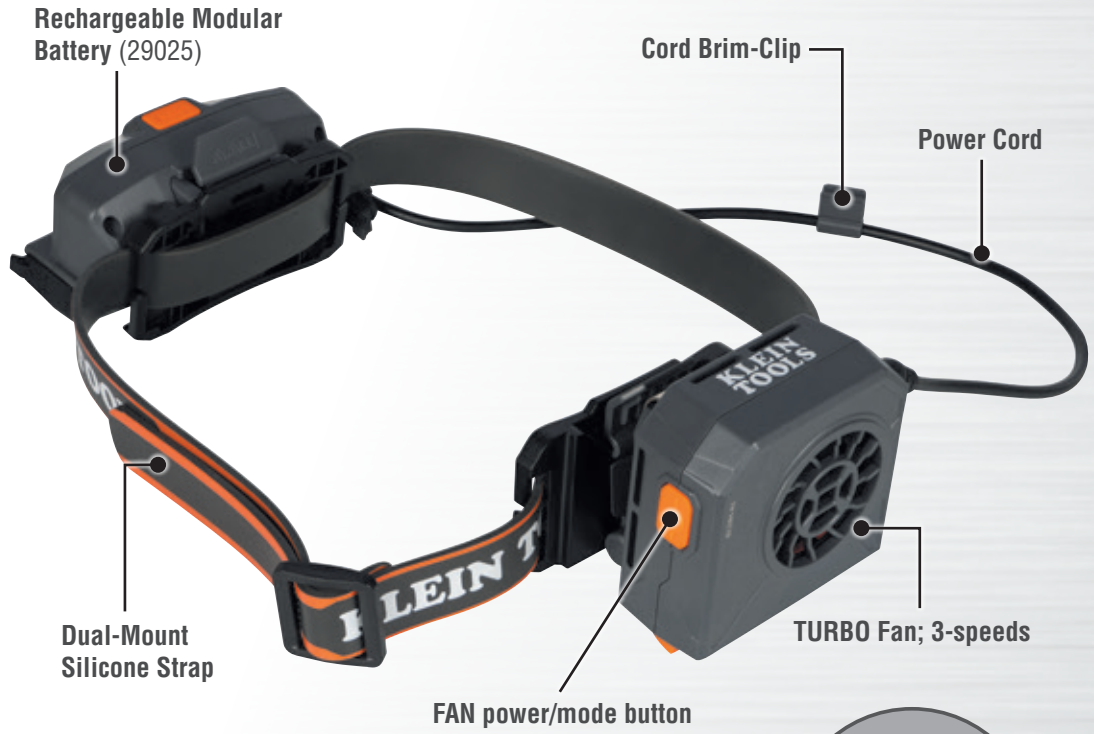

HARD HAT TURBO FAN

Klein Tools Hard Hat Turbo Fan is designed to fit on the brim of most hard hats and safety helmets, but can also be used with the included dual-mount silicone strap (and hinged adapter) for shells without a brim, or hard hats without Klein's mounts. The included Hinged Adapter Bracket attaches directly to the front and back accessory mounts on Klein Tools hard hats and safety helmets without brims, as well as on the Dual-Mount Strap (60949) for hard hats without mounts. The three-speed Turbo Fan is powered by the included Klein Modular Li-ion Battery (29025), with run times up to 12 hours. An additional Turbo Fan (60822) can be connected to the battery for more air flow, and the battery can be swapped out with another for extended run times!

WORKS WITH ANY HARD HAT OR SAFETY HELMET

REPLACEMENT PARTS / ACCESSORIES:

Dual Mount Strap (included) works with hard hats without Klein mounts
