

CELL PHONE LOCKERS

CHARGING STATION FOR SMALL ELECTRONICS

Easily add quick cell phone storage for your facility with the Lyon cell phone locker. This locker includes 14 individual use doors with USB charging outlets. One secured space is used to house the USB converter. This converter plugs into any standard outlet. The master door provides access to all the openings at once. Each locker includes mounting brackets to easily hang the unit on the wall and keep your floor space clear.

- Includes number plates
- Available in Monorail Gray - Ships Assembled

No. 7GCP799

USB CHARGING OUTLETS AND CONVERTER

Each opening includes a secured USB charging outlet mounted to the back of the locker. The bottom, center door houses the converter. The AC plug for the converter can be routed out through the bottom or the back of the cell phone locker.

MASTER DOOR AND HANDLE

When not in use, the master handle is closed flush against the locker. When unlocked, the handle releases and creates a turn handle for opening the master door. The full front of the master door opens allowing access to all 15 openings.

ADDITIONAL LOCK OPTIONS

Standard pull handles with hasps allow individual users to provide their own padlocks to secure each door closed. Alternatively these hasps can be replaced with built-in combination, keyed, or digital electronic locks.
