

700 SERIES KNEE PADS

KNEE PROTECTION

700 Series Knee Pads feature pre-curved foam that cradles your knees and actively absorbs impact when you come in contact with the ground. The knee pads are constructed with rugged Armortex® to resist punctures and abrasions from concrete to gravel. Computerized patterning and assembly ensures each knee pad is optimized to fit properly. Dual stretch Neoprene leg straps and non-slip laminate secure each pad to your leg without restriction.

FEATURES

- 1 Armortex® knee pad resists abrasive surfaces from concrete to gravel.
- 2 Pre-Curved foam design cradles your knees and absorbs impact when coming in contact with the ground.
- 3 Compression molded foam absorbs impact to the knees.
- 4 Stretch-Neoprene leg straps with industrial strength hook and loop secure each pad comfortably to your knees.
