

DLRO10 Series improvements

Product Enhancement Summary

Megger Instruments Ltd in Dover is pleased to announce two new accessories for the DLRO10 series.

DLRO10LPU LINE POWER UNIT

The DLRO10 and DLRO10X can now be powered from a mains / line power supply.

The DLRO10LPU unit is simply fitted to the instrument in place of the standard battery pack.

When in use a red LED is illuminated when the instrument is powered from a mains/line power supply.

The DLRO10X is seen here fitted with the DLRO10LPU which will be available as an optional accessory.

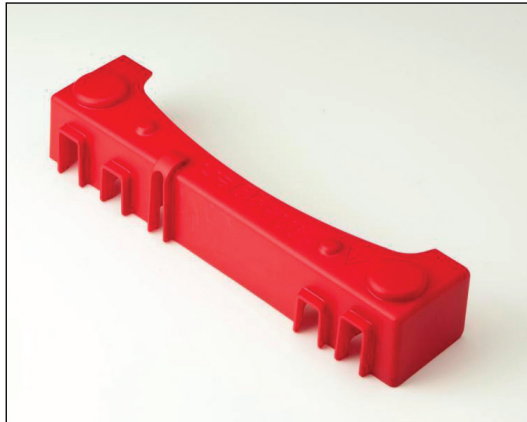

The DLRO10X will particularly benefit providing the ability to store test results with memos whilst powered from a mains/line supply.

Ideal for repetitive testing applications such as manufacturing production line use.

ORDERING INFORMATION

| Item | Cat. No |
|---|----------------|
| DLRO10LPU-EU Mains power attachment - schuko plug | 1003-172 |
| DLRO10LPU-UK Mains power attachment - UK plug | 1003-093 |
| DLRO10LPU-US Mains power attachment - US plug | 1003-171 |

DLRO10HD TERMINAL COVER

The CATIII 300V rating on the DLRO10HD is only valid when the instrument is fitted with terminal covers to provide the required insulation at the instrument terminals.

Until now the data sheet listed a complete test lead option the DH7.

Now a Megger bespoke cover is available that simply clips over the terminal posts.

The terminal cover may be used with any test leads, however only the Megger DH4 and DH5 duplex handspikes have suitable probe insulation to comply with the requirements of IEC61010-1 and the CATIII 300V rating.

ORDERING INFORMATION

| Item | Cat. No |
|--|----------|
| Terminal cover (use in conjunction with DH4 test leads supplied as standard, or optional DH5 test leads for CATIII 300V compliance) | 1002-390 |
