

# NetKey® White Flush Mount Patch Panels

## specifications

Flush mount patch panels shall consist of a white, metal panel with molded white, rear snap-in faceplates. Patch panels shall accept all NetKey® Modules for UTP, fiber, or A/V applications and shall mount to standard 19" racks. Patch panels shall be available in 24-port and 48-port standard density, as well as 48-port high density for 48-port count in 1 RU. Flush mount patch panels shall be easy to identify with pre-numbered ports. Angled patch panels shall be designed at an optimum angle to help route the cable.

## technical information

<b>Mounting options:</b>	Mounts to standard EIA 19" racks or 23" racks with optional extender brackets
<b>Material:</b>	Stamping is white CRS and faceplate is white ABS
<b>Packaging:</b>	Packaged with appropriate pre-installed snap-in faceplates and a set of mounting screws (#12-24)

## key features and benefits

<b>Modular</b>	Accepts all Panduit® NetKey® Modules to mix and match media types in the same panel
<b>Angled design</b>	Allows cable to flow to each side of the rack and minimizes the need for horizontal cable managers by enabling patch cords to be routed directly into vertical cable managers which leads to increased closet density
<b>Optional strain relief bars</b>	Help support and manage cables
<b>Optional filler panels</b>	Fill unused rack openings to provide a clean and consistent look

## applications

NetKey® Flush Mount Patch Panels in white are ideal for multi-media applications. They accept all NetKey® Modules and mount flush with the front of the rack for a clean appearance. Various styles and port densities are available to fit most needs. Angled patch

panels are available for applications in which rack space is limited. The design allows cable to flow to each side of the rack, minimizing the need for horizontal cable managers and increasing the density of the rack space.
