## Sound Level Meter PCE-318

Sound level meter PCE-318 with a range between $26 \ldots 130 \mathrm{~dB}(\mathrm{~A})$ and an analog output/ recalibrated / Class II (accuracy $\pm 1.5 \mathrm{~dB}$ )
The noise meter PCE-318 detects the volume from a sound level of $26 \mathrm{~dB}(\mathrm{~A})$. The meter is ideal for measuring very low noises, for example, noises from computer fans. The class II noise meter with jumbo display (and at a very good price / performance ratio) is ideal for measurements of sound and noise in different environments, at work, condition monitoring, etc.

Also known as the phonometer, this device is designed to IEC 651 Type II and has a very high accuracy of $\pm 1.5 \mathrm{~dB}$. Another advantage of this meter is the analogue output. This allows the connection of an external data logger / recorder for long-term recording.

- measuring range 26 ... 130 dB
- 6 measuring ranges selectable
- analog output (AC \& DC) / usable in combination with optionally available data logger (see accessories)
- memory for 99 measured values, available in the display
- frequency range 31.5 Hz to 8 kHz
- large display with bargraph
- adjustable measuring ranges on the dB meter: Low \& High
- $A$ and $C$ frequency rating
- fast and slow time evaluation
- Min- \& Max Hold function
- Tripod mounting device
- including wind noise suppressor

## Specifications

## Technical specifications

| Measurement range | $26 \ldots 130 \mathrm{~dB}$ |
| :--- | :--- |
| Level range selection | 6 level ranges: $26 \ldots 80 \mathrm{~dB}, 30 \ldots 90 \mathrm{~dB}, 40 \ldots 100 \mathrm{~dB}$, |
|  | $50 \ldots 110 \mathrm{~dB}, 60 \ldots 120 \mathrm{~dB}, 70 \ldots 130 \mathrm{~dB}$ |
| Resolution | 0.1 dB |
| Accuracy | $\pm 1.5 \mathrm{~dB}$ (ref. 94 dB at 1 kHz ) |
| Frequency range | $31.5 \mathrm{~Hz} \ldots 8 \mathrm{kHz}$ |
| Time weighting | Fast and Slow |
| Frequency weighting | A and C |
| Memory | Up to 99 readings, available on the display |
| Output | Analog, AC / DC |
| Operating conditions | $-10 \ldots+50^{\circ} \mathrm{C} /+14 \ldots+122^{\circ} \mathrm{F}$, less than $90 \% \mathrm{RH}$ |
| Storage conditions | $-10 \ldots+60^{\circ} \mathrm{C} /+14 \ldots+140^{\circ} \mathrm{F}$, less than $75 \% \mathrm{RH}$ |
| Power | $1 \times 9 \mathrm{~V}$ battery (PP3) |
| Weight | Approx. $260 \mathrm{~g} / 0.57 \mathrm{lb}$ |
| Dimensions | Approx. $264 \times 68 \times 27 \mathrm{~mm} / 10.39 \times 2.68 \times 1.06 "$ |
| Standards | IEC 651 Type 2 Class 2 |
