

ALCOHOL TESTER

PCE-ALC 40

- » measurement range 0 ... 1 g/l
- » quick results
- » units: g/l, mg/l
- » internal memory for up to 50 measurements
- » displays the sensor service life

The small alcohol tester is ideal for travelling: compact and easy to use. Our alcohol tester has a measurement range of 0 ... 1 g/l. The alcohol tester is perfect for a quick self-test to be on the safe side. After blowing against the sensor for six seconds, the approximate alcohol content appears on the display.

The measured values appear both as a numerical value and in the form of a traffic light display, optionally in g/l or mg/l. The sensor is designed for up to 1500 measurements and the remaining life of the sensor is also displayed. Thanks to the internal memory, up to 50 values can be saved in our alcohol tester. The alcohol tester is powered by AAA batteries which are easy to replace and available anywhere.

Specification

Alcohol content	
Measurement range up to	0 ... 1 g/L
Resolution	0,01 g/L
Accuracy	0.1 g/l

General technical data	
Units	mg/l, g/l
Display size	1,6 Inch
Storage medium	Internal memory
Storage capacity	50 Values
Service life	The sensor is suitable for up to 1500 measurements
Menu language	English, English (GB)
Protection class (device)	IP20
Weight	24,5 g
Operating conditions	5 ... 35 °C , 10 ... 95 % RH
Storage conditions	0 ... 40 °C , 10 ... 95 % RH
(Rechargeable) battery	2 x 1,5 V AAA battery , Alkali-manganese
Capacity	1200 mAh
Dimensions (L x W x H)	70 x 40 x 18 mm
