

Platoshear Ergonomic Cutter

170LX

Plato shears have a thin profile designed for those hard-to-reach areas in electronic assembly. Assemblers love the effortless shearing action, comfort, light weight, and safety for electronics lead and wire cutting. Platoshears use the shear cutting method, which requires 50% less operator effort and extends cutting life because they shear rather than pinch. Handles are cushioned for day long comfort, and automatically spring back to their original position after each use.

Plato solder pots are ideal for tinning lead wires, pre-tinning small electrical parts, or dip soldering small assemblies and circuit devices. **Porcelain Coated Crucibles** Plato's porcelain coated crucible is easy to clean and offers a long service life. Solder will not adhere to the porcelainized surface, allowing for easy maintenance. The coating also resists the corrosion common with activated fluxes and high tin content solders. All Plato solder pots can be ordered with a porcelain coated crucible by adding a "P" to the end of the part number.

Ergonomic, ESD-safe shear lead cutter

The 170LX is a remarkable advancement in cutter design. Carefully crafted precision cutting blades combine seamlessly with curved, palm shaped, handles to deliver effortless lead cutting and user comfort.
