

TS250 Series Dispenser

Entry-Level Digital Dispenser

The TS250 Series Dispenser dispenses low, medium and high viscosity fluids, accurately and consistently.

These systems are economical, highly accurate and repeatable micro air dispensing systems.

These user friendly dispensing systems include a digital timer, with rotary timing knob, for easy setup and a vacuum control for all viscosities of fluid.

The rear DB9 interface connector has the ability to initiate the dispense cycle by an external device by way of voltage or contact closure signal.

Available in two versions of operating pressure: 0 to 100 psi (0 to 6.9bar) for general applications and 0 to 15 psi (0 to 1.0bar) for specific low viscosity applications.
