Product Data Sheet

Product Number: 758ST2601

Model: ESD-Safe Tape Dispenser, Holds 1 Roll 1" Wide with 3" Core

Description:

A high quality steel desktop tape dispenser comes with a weight rubber lined base to secure the dispenser to the work surface. The dispensers are compatible for tapes with a 3 in. core diameter and the maximum outside roll diameter that can be supported/hold is 5 in., so it works perfectly with office supply tapes and ESD tapes. The extra-wide serrated blade reduces the working time required to align the tape with the cutting edge, which increases speed and efficiency. A pivoting blade guard provides protection from accidental contact. When closed, it will also assist in keeping the tape secure from rolling back on itself.
