Product Data Sheet

Product Number: 758ST603

Model: ESD-Safe Tape Dispenser, Holds 3 Rolls 1" Wide with 3" Core

Description:

A high quality steel desktop tape dispenser comes with a weight rubber lined base to secure the dispenser to the work-surface. The dispensers are compatible for tapes with a 3 in. core diameter and the maximum outside roll diameter that can be supported/hold is 5 in., so it works perfectly with office sup-ply tapes and ESD tapes from Transforming Technologies. The extra-wide serrated blade reduces the working time re-quired to align the tape with the cutting edge, which increases speed and efficiency. A pivoting blade guard provides protection from accidental contact. When closed, it will also assist in keeping the tape secure from rolling back on itself. The two available sizes make way for wider rolls of antistatic tape, or mixing and matching multiple widths on the same ESD tape dispenser.
