TRCP0300-TRCP0600 Current Probes

The TRCP0300 and TRCP0600 are designed for use on small form factor components. These AC-only Rogowski probes have a thin, flexible coil that can easily be wrapped around test points such as the leg of a transistor.

TRCP3000 Current Probe

The TRCP3000 has a larger coil that is capable of handling large overload currents without damage. This probe is easy to use and can be inserted into places that are hard to reach and can be wrapped around larger test points such as bus bars.
