

# TestEquity Model 123C Benefits over Model 115A

**TestEquity Model 123C Temperature Chamber** gives you "big-chamber" features and performance in a compact, 120V-input design. It offers many improvements over the **TestEquity Model 115A Temperature Chamber** and similar-class products from other manufacturers.

- **53% Larger workspace**
  - Model 123C: 2.3 Cu Ft Workspace, 18" W x 16.5" H x 13.5" D
  - Model 115A: 1.55 Cu Ft Workspace, 16" W x 12" H x 14" D
- **Increased airflow for better heat transfer to load**
  - Model 123C: 160 cfm
  - Model 115A: 85 cfm
  - Model 115 (discontinued): 60 cfm
- **Adjustable shelf**
  - Model 123C: Shelf is adjustable in 0.5" increments. Additional shelves can be placed as close as every 1.5".
  - Model 115A: Shelf height is fixed at 3" from the chamber floor. Additional shelves must be stacked on top of each other, spaced at 3".
- **Chart Recorder option**
  - Model 123C: Circular chart recorder available - mounts in lower front panel.
  - Model 115A: Circular chart recorder option is not available.
- **GPIB option**
  - Model 123C: Choice of internal or external GPIB interface converter.
  - Model 115A: External GPIB interface converter only.
