

Thermo Scientific 20240662 Vacuum Pump, 230V 50/60Hz, Reliable, High-Performance Lab Equipment

Thermo Scientific 20240662 Vacuum Pump – 230V, 50/60Hz

Key Features:

Model: 20240662

Type: Vacuum pump

Voltage: 230V

Frequency: Compatible with both 50Hz and 60Hz for versatile operation

Application: Suitable for laboratory, research, and industrial environments

Durable Design: Engineered for continuous, long-term use

Efficient Performance: Provides consistent vacuum output with low maintenance

Compact & Versatile: Easily integrates into a wide range of systems

Overview:

The Thermo Scientific 20240662 vacuum pump offers a dependable and efficient solution for diverse vacuum applications in lab, research, and industrial settings. With a robust design and dual-frequency compatibility, this 230V pump is built for global adaptability and long-lasting performance, making it a smart choice for high-demand environments.
