- Kraftform Micro nutsetter for hex head screws
- Multi-component Kraftform Micro handle for fast and ergonomic screwdriving
- Take it easy tool finder: colour coding according to profile and size
- Anti-roll feature and swivel cap for rapid twisting
- E.g. for electricians, opticians, precision mechanics, jewellers or IT hardware fitters

High quality Wera Micro nutsetter for precision mechanical work. Rapid twisting is possible by fixing the hand on the twist cap and using the fast-turning zone just below it. This makes time-consuming grip adjustments unnecessary. Power zone with integrated soft zones ensure the transfer of higher tightening and loosening torque. Precision zone for the right angle for adjustment work. "Take it easy" tool finder with colour coding according to profiles and size stamp - for simple and rapid accessing of the required tool.

Series Kraftform Micro

**Kraftform Micro handle**

Screwdriving jobs in electrical and precision engineering applications are often tedious and time-consuming. We learned from users what is important for them: working speeds, torque, precision - and we then focused particularly on these issues.

Multi-component screwdriver handle for ergonomic working.

**The refined screwdriver for electronics technicians**

The Kraftform Micro, with its three zones and their specific arrangement, satisfies these requirements perfectly. The free-turning cap that provides support for the hand works with these advantages, enabling quick and easy precision work.

**The precision zone**

The precision zone directly above the blade gives the user a better feel for the right rotation angle during fine adjustment work.

**The power zone**

The power zone has integrated soft zones near the blade tip to ensure high torque transfer for loosening or tightening screws without losing contact with the screw.

**The fast-turning zone**

The fast-turning zone just below the rotating cap allows rapid twisting.

**"Take it easy" Tool Finder**

Screwdrivers with "Take it easy" tool finder: colour coding according to profile and size stamp.

**Applications**

Indispensable for many users, including electronics technicians, opticians, precision engineers, jewellers, EDP hardware fitters and model-makers
