Bicycle Set 4, 9 pieces

L-Keys for Hexagon Socket Screws

 $\bigcirc \mathbf{0}$

EAN: Part number: Article number:

4013288211446 05004173001 Bicycle Set 4 Size:220x100x40 mmWeight:484 gCountry of origin:CZCustoms tariff
number:82079030

- L-key set for hexagonal socket screws and TORX® screws
- L-keys with Hex-Plus advantage for a longer screw life
- L-keys are quickly to hand thanks to their size markings
- Wear-resistant size marking
- In a practical, lightweight folding pouch for easy carrying
- The holding function holds screws securely on the tool

L-keys made from circular material with plastic sleeve for use on bicycles. The plastic sleeve makes working comfortable even at low temperatures and is easy on the fingers. All L-keys are easily accessible due to their colour coding and size markings. For hexagonal socket screws and TORX® screws. In a robust and lightweight folding pouch.

L-Keys for Hexagon Socket Screws

Bicycle tool set

SPKL L-keys

Hex-Plus

For the road and the workshop

Compact screwdriving tool set for bicycle applications, also for mobile use.

L-keys made from circular material with plastic sleeve for use on bicycles. The plastic sleeve makes working comfortable even at low temperatures and is easy on the fingers. All L-keys are easily accessible due to their colour coding and size markings. For hexagon and TORX® screws.

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

L-keys with retaining function for hexagon socket screws

The clamping of the screw is achieved by a flexible locking ball. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw on the tool.

Holding function for recessed TORX® screws

The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that TORX® screws made according to Acument Intellectual Properties specifications are securely held on the tool! Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

Take it easy tool finder system

Take it easy tool finder system with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).
