

<b>EAN:</b>	4013288158437	<b>Size:</b>	100x60x10 mm
<b>Part number:</b>	05073931001	<b>Weight:</b>	8 g
<b>Article number:</b>	868/1 IMP DC SB SiS	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82079030

- Suitable for square socket screws
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- Take it easy tool finder: colour coding according to profile and size

High quality bits for square socket screws. The Impaktor technology offers an above-average service life even under extreme circumstances. Enhanced friction resistance, thanks to the rough diamond-particle coating on the bit tip, prevents any slipping out of the screw head. Particularly suitable for use with customary impact drivers. 1/4" hexagon, suitable for holders as per DIN ISO 1173-D 6.3.

## Bits for Square Socket Screws

### Set contents:

868/1 IMP DC Impaktor Square-Plus bits, # 2 x 25 mm

1x # 2 x 25 mm

### Impaktor-Bits

Impaktor technology for an above-average service life even under extreme demands

For an above-average service life. Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects - particularly high in power tool applications - which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

### Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

### Above-average service life

Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

## Bits for Square Socket Screws

### Reduced danger of bit breakage.

Particularly high strength. Reduce the danger of premature bit breakage.

### Torsion zone

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

### Diamond coating

Another product advantage is the coating of the Impaktor bits with minute diamond particles.

### Reduced contact pressure

These diamond particles reduce the cam-out effects - particularly high in power tool applications - which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.
